neuron esb

The Simple Solution to Your Complex Integration Challenges

Built by .NET Developers for .NET Developers

93% Reduction in implementation costs

80% Fewer configuration steps

20x Lower annual support costs

12x Reduction in software licensing costs
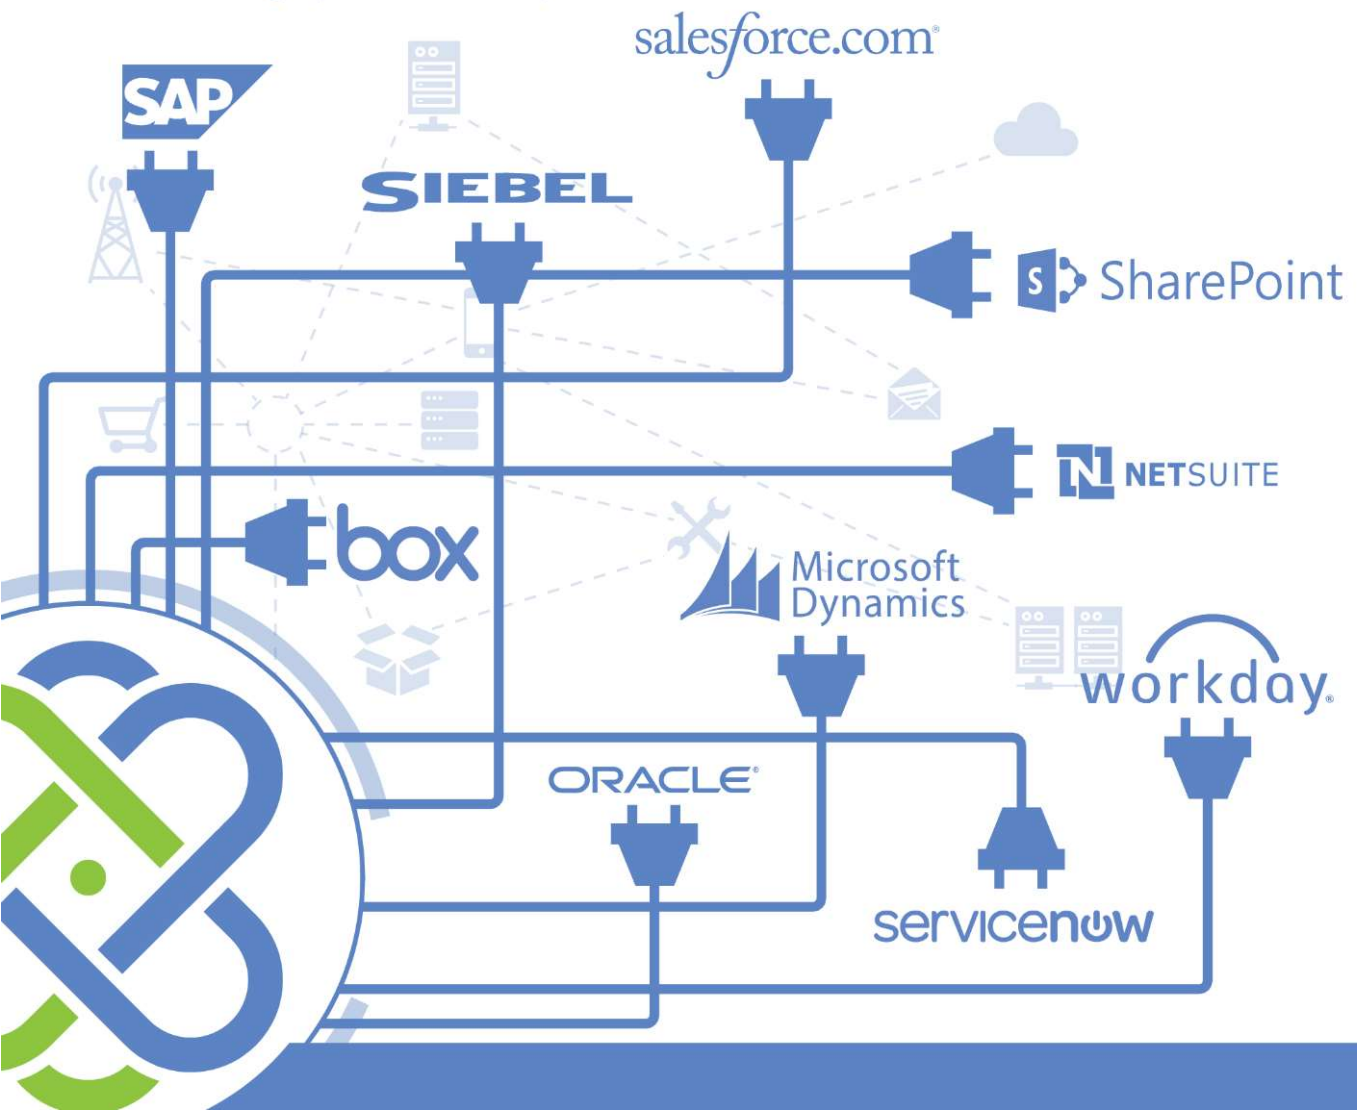

8.5x Faster request-response time

Fast • Easy • Affordable

The Fastest, Easiest, Most Affordable Integration Solution Built for .NET

Discover a better approach to enterprise modernization and integration. Neuron ESB is an easy-to-use yet powerful enterprise service bus that simplifies messaging and Web service enablement to accelerate the adoption of service-oriented architecture. Instead of taking months to deploy projects using competing products, Neuron ESB will have you up and running in a matter of days.

Neuron ESB serves as the cornerstone of business innovation, allowing you to take existing services and applications and create new capabilities exposed by SOAP or REST. And because Neuron ESB is built on Microsoft .NET, you'll be able to use your existing skills and tools to quickly and seamlessly connect all your systems and applications – whether on premise, in the cloud or in a hybrid environment.

Neuron ESB's Out-of-the-Box Adapters Make Connecting Systems a Snap

Just a Few Powerful Features of Neuron ESB

Fault-Tolerant, Long-Running Orchestration

Design robust transaction architecture by leveraging Neuron ESB's workflow and orchestration engine to create long-running, fault-tolerant business processes.

Real-Time Business Process Designer

Get more than 40 business activities out of the box to develop rules that execute in real time with your business information, without special tools, technologies or skills.

Simplified Service Hosting and Mediation

Extend, host and integrate all web service (SOAP/REST) endpoints with ease, and manage existing services with uniform security, policy and reporting options.

Configurable and Easy to Use

Leverage configurable transport protocols (MSMQ, RabbitMQ, TCP, named pipes, peer) to drive events to and from systems based on user-defined criteria.

Comprehensive Connectivity Options

Speed deployment with codeless connections to Microsoft Dynamics, SAP, Salesforce.com, NetSuite, SharePoint, ODBC, POP3, Microsoft Exchange, SQL, SPTF/FTP/FTPS, MQSeries, RabbitMQ, ActiveMQ and more.

Step-by-Step Debugging Support

Experience the same level of design-time debugging support you get from Microsoft Visual Studio to test, diagnose and fix business processes faster during development.

Visual Studio-Like Language Editors

Expand business processes and workflows directly in Neuron ESB using C#, VB.NET or JavaScript, without having to manage or deploy complex .NET assemblies.

Customer Success Story

Serving up flexible integration to merge disparate systems and accelerate project timelines

> *Neuron ESB has definitely simplified our world. Instead of wasting time trying to figure out how a system interface works, we just hook it up to Neuron and BOOM, it's done.*

neuron&esb

The Neuron ESB Advantage

- Cuts your integration costs up to 70%
- Speeds delivery of your solutions
- Leverages your existing .NET skills
- Reduces the need for custom development
- Makes your developers more productive
- FREE architectural review and training included

3-Day Proof of Concept **FREE**

No obligations. Only proof. Call
